Accessibility sidewalk work affects Union Avenue

Fairfield, California (Wednesday, September 21, 2017)—Fairfield's Public Works Department and its contractor, California Highway Construction Group, Inc., are working to improve pedestrian accessibility along Union Avenue.

Beginning September 25, the east sidewalk in front of the Solano County Court Building complex will be coned off in certain work areas, leaving a smaller footprint of the sidewalk for pedestrian traffic. Additionally, there will be limited northbound, on-street parallel parking for the duration of the construction, and there will be one lane shift but no closures.

These accessibility improvements are expected to be completed by October 23.
