Possible PG & E Public Safety Power Shutoff

Fairfield, California (Friday, October 25, 2019)—PG & E has notified Fairfield residents that power may be shut off Saturday October 26, 2019 due to a possible wind event.

Residents should have a plan in place for 3-5 days without power. For updates and information, residents should subscribe to:

- Nixle.com
- [Alert Solano](#)
- Fairfield.ca.gov

This event has the potential to impact both City water treatment plants. The City will continue to produce water, but at a limited production rate. We are asking residents to conserve water by avoiding outdoor irrigation and other non-essential uses during the power shut-off period.

For more information on the public safety power shutdown, visit www.pge.com.
